

SCHEDULE 2

PHYTOSANITARY REQUIREMENTS FOR PLANTS AND SHOOTS

[Section 11.1(b)(iii); 11.3(a); 12(b)]

1. Establishment requirements

The plant material established in a unit and the plants obtained therefrom shall at all times during the term of registration of such unit comply with the following requirements:

1.1 Rootstock

Plant material and plants of rootstock varieties shall -

1.1.1 be free from the following viral disease and phytoplasmas:

Grapevine fanleaf
Aster Yellows;

[Subparagraph 1.1.1 substituted by R. 227 of 19 March 2021]

1.1.2 comply with the requirements as determined by the authority, in so far as it relates to the occurrence of the following viral diseases:

Grapevine fleck
Grapevine leafroll
Grapevine corky bark
Grapevine stem pitting/grooving
Shiraz disease;

1.1.3 be visually free from the following bacterial diseases:

Agrobacterium vitis (Crown gall)
Xylophilus ampelinus (Bacterial blight); and

1.1.4 be visually free from the following fungi and fungal diseases:

Pythium spp.
Phytophthora spp.

1.2 Scions

Plant material and plants of scion varieties shall -

1.2.1 be free from the following viral disease and phytoplasmas:

Grapevine fanleaf

Aster Yellows;

[Subparagraph 1.2.1 substituted by R. 227 of 19 March 2021]

- 1.2.2 comply with the requirements as determined by the authority, in so far as it relates to the occurrence of the following viral diseases:

Grapevine fleck
Grapevine leafroll
Grapevine corky bark
Grapevine stem pitting/grooving
Shiraz disease;

- 1.2.3 be visually free from the following bacterial diseases:

Agrobacterium vitis (Crown gall)
Xylophilus ampelinus (Bacterial blight); and

- 1.2.4 be visually free from the following fungi and fungal diseases:

Pythium spp.
Phytophthora spp.

2. Certification requirements

The plant material obtained from the plants cultivated in a unit shall at the time of the presentation thereof for certification comply with the following requirements:

2.1 Rootstock

Plant material of rootstock varieties shall -

- 2.1.1 be free from the following viral disease and phytoplasmas:

Grapevine fanleaf
Aster Yellows;
[Subparagraph 2.1.1 substituted by R. 227 of 19 March 2021]

- 2.1.2 comply with the requirements as determined by the authority, in so far as it relates to the occurrence of the following viral diseases:

Grapevine fleck
Grapevine leafroll
Grapevine corky bark
Grapevine stem pitting/grooving
Shiraz disease;

- 2.1.3 be visually free from the following insects and mites:
Aonidiella aurantii (Red scale)
Daktulosphaura vitifoliae (Phylloxera)
Margarodes spp
Meloidogyne spp
Pseudococcus longispinus (Vine longtailed mealybug)
Planococcus ficus (Vine mealybug)
Quadraspidiotus perniciosus (Pernicious scale)
Tetranychus urticae (Two-spotted spider mite);

- 2.1.4 be visually free from the following bacterial diseases:

Agrobacterium vitis (Crown gall)
Xylophilus ampelinus (Bacterial blight); and

- 2.1.5 be visually free from the following fungi and fungal diseases:

Pythium spp.
Phytophthora spp.

2.2 Scions

Plant material of scion varieties shall -

- 2.2.1 be free from the following viral disease and phytoplasmas:

Grapevine fanleaf
Aster Yellows;
[Subparagraph 2.2.1 substituted by R. 227 of 19 March 2021]

- 2.2.2 comply with the requirements as determined by the authority, in so far as it relates to the occurrence of the following viral diseases:

Grapevine fleck
Grapevine leafroll
Grapevine corky bark
Grapevine stem pitting/grooving
Shiraz disease;

- 2.2.3 be visually free from the following insects and mites:

Aonidiella aurantii (Red scale)
Planococcus ficus (Vine mealybug)
Quadraspidiotus perniciosus (Pernicious scale)
Tetranychus urticae (Two-spotted spider mite);
[Subparagraph 2.2.3 substituted by R. 227 of 19 March 2021]

- 2.2.4 be visually free from the following bacterial diseases:

Agrobacterium vitis (Crown gall)
Xylophilus ampelinus (Bacterial blight); and

2.2.5 be visually free from the following fungi and fungal diseases:

Pythium spp.
Phytophthora spp.
